SCORE KEEPING & TIE BREAKING FOR ROUND ROBIN

All competitors (whether in team or individual competition) play one another in a pool to establish an order of finish. The final order is decided, taking account of all results in that pool (i.e. each match in an individual event or encounter in team event; is recorded as a win or a loss, with a win worth one point), as follows:

If two competitors are tied, the order of finish will be determined by the head-to-head result between the two competitors.

If three (or more) competitors are tied, the order of finish will be determined by the head-to-head results among the tied competitors:

1. first by the greater number of matches won against the tied competitors;
2. if equal, by the greater number of games won against the tied competitors;
3. if equal, by the greater positive difference between the games won and lost among the tied competitors;
4. if equal, by the greater positive difference between point won and lost among the tied competitors.

If any of the above criteria result in a tie between two competitors, then revert to the procedure for two teams tied (head-to-head result between the two teams).
